SUMMARY

Aspiring DevOps Engineer with hands-on experience in AWS, Docker, Kubernetes, Jenkins, Terraform, Ansible, Linux, Git, and Bash scripting, with practical expertise in CI/CD, cloud automation, Infrastructure as Code, containerized deployments, monitoring, Agile methodologies and DevOps best practices.

SKILLS

Cloud AWS

Containerization: Docker

Container Orchestration: Kubernetes

CI/CD: Jenkins

Scripting: Bash, Python, Ansible

Methodologies: Agile (Scrum)

IaC & Configuration Management: Terraform, Ansible

Observability: Prometheus, Grafana, OpenTelemetry

Operating System: Linux

Configuration Management: Ansible

Version Control: Git, GitHub, GitLab

PROJECTS

Automated AWS EKS Deployment Pipeline using Terraform and Jenkins

[View Repository](#)

- Automated the deployment lifecycle of a React application by building a CI/CD workflow with GitHub, Jenkins, Docker, Kubernetes, Terraform, and AWS EKS, while provisioning cloud infrastructure including VPC, subnets, IAM roles, and managed worker nodes using Terraform, managed worker nodes, and networking resources through Terraform IaC.
- Developed a Jenkins Declarative Pipeline to automate source code checkout, Docker image build, image publishing to Docker Hub, Kubernetes deployment updates, and rollout verification for reliable application delivery.
- Deployed the application on Amazon EKS using Kubernetes Deployments and LoadBalancer Services, integrating Prometheus and Grafana for real-time monitoring of cluster health, resource utilization, and application performance through custom dashboards.

End-to-End DevOps CI/CD Pipeline for Containerized React based Application

[View Repository](#)

- Established an automated build and deployment workflow for a containerized e-commerce application using GitHub, Jenkins, Docker, Docker Hub, and Docker Compose, streamlining image versioning, registry management, and application deployment.
- Configured a Jenkins Declarative Pipeline integrating GitHub SCM, Docker image build, image promotion between development and production Docker Hub repositories, Docker Compose deployment, GitHub webhook triggers, and a manual approval gate for controlled production releases.
- Integrated Prometheus, Grafana, Node Exporter, cAdvisor, and Alertmanager to provide real-time infrastructure and container monitoring, interactive dashboards, and automated email notifications for proactive failure detection.

AWS-Native CI/CD Pipeline for Amazon EKS Deployment

[View Repository](#)

- Built a cloud-native software delivery pipeline using AWS CodePipeline, AWS CodeBuild, Docker, Kubernetes, and Amazon EKS to automate application integration, image creation, and deployment on Kubernetes.
- Created a buildspec.yml workflow in AWS CodeBuild to automate application build, Docker image creation, image publishing to Docker Hub, deployment artifact generation, and configured AWS CodePipeline to orchestrate source retrieval from GitHub, continuous integration with CodeBuild, and automated deployment to Amazon EKS.
- Deployed containerized workloads on Amazon EKS using Kubernetes Deployments and LoadBalancer Services, enabling automated rollout and external application access.

EXPERIENCE

Testing - Graduate Engineer Trainee (GET)

Jun 2025 – Feb 2026

Flextronics Technologies India Pvt. Ltd.

Sriperumbudur, Tamil Nadu

- Supported New Product Introduction (NPI) for Cisco Nexus datacenter switches by validating production test infrastructure, executing functional tests, and qualifying manufacturing test systems.
- Performed failure log analysis, assisted in Root Cause Analysis (RCA), and monitored manufacturing yield to improve product quality and achieve First Pass Yield (FPY) targets ranging from 86% to 94% across different Cisco Nexus switch models for mass production.

COURSE WORK

Certified DevOps Professional Course

HCL Guvi

[View Certificate](#)

Machine Learning Specialization

Coursera

[View Certificate](#)

ACHIEVEMENTS

- Secured First Prize and a cash award of Rs. 10,000 in the Silicon Mastery track of the IEEE CASS Symposium "AI for Sustainable Development" organized by Vel Tech in association with IEEE CASS Madras Chapter.
- Received a Special Appreciation Award for contribution towards Innovative Research & Development during the Academic year 2023-24.

EDUCATION

B.E Electronics and Communication Engineering, Tagore Engineering College

2021–2025

CGPA: 8.26/10

HSC (CBSE), Prince Srivari Senior Secondary School

2021

Percentage: 83.4%

SSLC (CBSE), Prince Srivari Senior Secondary School

2019

Percentage: 84.2%
