SUMMARY

Aspiring DevOps engineer with hands-on experience through self-driven projects in CI/CD, containerization using Docker, Kubernetes, infrastructure automation with Terraform, and AWS cloud infrastructure. Skilled in building automated pipelines with Jenkins, monitoring with Prometheus and Grafana, and troubleshooting across the application-to-infrastructure stack.

SKILLS

Cloud: AWS

CI/CD: Jenkins, ArgoCD

Configuration Management: Ansible

Programming: Python, Java

Version Control: Git, GitHub

Build Tools & APIs: Maven, Gradle REST APIs

Containers & Orchestration: Docker, Kubernetes, Helm

Infrastructure as Code: Terraform

Monitoring: Prometheus, Grafana

Scripting: Shell Scripting

Databases: MySQL, PostgreSQL

Operating System: Linux

PROJECTS

Automated AWS EKS Deployment Pipeline using Terraform and Jenkins

github.com/RaguraamanVM/trendstore-devops-cicd-pipeline.git

- Automated deployment of an application via CI/CD workflow using GitHub, Jenkins, Docker and AWS EKS; provisioned cloud infrastructure (VPC, subnets, IAM roles, worker nodes) using Terraform, reducing manual provisioning steps to a single automated run.
- Developed a Jenkins Declarative Pipeline automating source code checkout, Docker image build, image publishing to Docker Hub, Kubernetes deployment updates, and rollout verification, condensing a multi-step manual process into a single pipeline trigger.
- Deployed the application on Amazon EKS using Kubernetes Deployments and LoadBalancer Services, integrating Prometheus and Grafana for real-time monitoring of cluster health, resource utilization, and application performance through custom dashboards.

End-to-End DevOps CI/CD Pipeline for Containerized React-based Application

github.com/RaguraamanVM/E-commerce-app-Devops-cicd-pipeline.git

- Established an automated build and deployment workflow for a containerized e-commerce application using GitHub, Jenkins, Docker, Docker Hub, and Docker Compose, replacing manual image builds and deployments with a single automated pipeline trigger.
- Configured a Jenkins Declarative Pipeline integrating GitHub SCM, Docker image build/promotion across dev-to-prod Docker Hub repos, Docker Compose deployment, and webhook-triggered runs with a manual approval gate for controlled releases.
- Integrated Prometheus, Grafana, Node Exporter, cAdvisor, and Alertmanager to provide real-time infrastructure and container monitoring with automated email alerts, reducing failure-detection time from manual log-checking to near real-time notification.

AWS-Native CI/CD Pipeline for Amazon EKS Deployment

github.com/RaguraamanVM/Mindtrack-app-cicd-pipeline.git

- Built a cloud-native software delivery pipeline using AWS CodePipeline, AWS CodeBuild, Docker, Kubernetes to automate application builds, image creation, and deployment on Amazon EKS, eliminating manual build-and-deploy steps across the full release cycle.
- Created a buildspec.yml workflow in AWS CodeBuild to automate application build, Docker image creation, and publishing to Docker Hub; configured AWS CodePipeline to orchestrate GitHub source retrieval, CI with CodeBuild, and automated deployment to AWS EKS.
- Deployed containerized workloads on Amazon EKS using Kubernetes Deployments and LoadBalancer Services, enabling automated rollout and external application access.

EXPERIENCE

Graduate Engineer Trainee (GET) – Testing

Flextronics Technologies India Pvt. Ltd.

Jun 2025 – Feb 2026

Sriperumbudur, Tamil Nadu

- Executed and monitored automated, multi-stage test pipelines (diagnostic OS deployment, hardware/port validation, environmental stress testing, network validation) for Cisco Nexus series switches using an automated test-orchestration platform.
- Performed failure log analysis and root-cause troubleshooting to diagnose hardware, software, and network-level issues while supporting production test infrastructure qualification and reliability validation under New Product Introduction, maintaining First Pass Yield of 86%–94% across multiple Cisco Nexus switch models.

CERTIFICATIONS

DevOps and Cloud Computing

HCL Guvi

[Credential ID: u18FaDSxzHEQ8ecG](#)

Machine Learning Specialization

Coursera

[Credential ID: PXL98YJ3Q3KD](#)

ACHIEVEMENTS

- Secured First Prize and a cash award of Rs. 10,000 in the Silicon Mastery track of the IEEE CASS Symposium "AI for Sustainable Development" organized by Vel Tech in association with IEEE CASS Madras Chapter.
- Received a Special Appreciation Award for contribution towards Innovative Research & Development during the 2023–24 academic year.

EDUCATION

B.E. in Electronics and Communication Engineering, Tagore Engineering College

2021–2025

CGPA: 8.26/10

HSC (CBSE), Prince Srivari Senior Secondary School

2021

Percentage: 83.4%

SSLC (CBSE), Prince Srivari Senior Secondary School

2019

Percentage: 84.2%
